cuattro **Uno**

Cuattro Uno™ Digital Radiography... The one and only.

The 16 pound, all wireless Cuattro Uno packs more power and technology than popular x-ray-only devices many times its size. Cuattro Uno is the world's only all-in-one 90kVp/20mA handheld wireless digital radiography system that includes a removable full HD image acquisition and clinical review control (Hub Micro™). Everything about Cuattro Uno is fully wireless and battery powered, including its 10x12" and 14x17" AED detectors. Cuattro Uno is faster, smaller, lighter, easier to use, and in a class of its own. Exclusively from Heska.

cuattro Uno

Cuattro Uno is the fastest all-in-one imager the industry has ever seen. It's not even close. Open the charging Smart Case (included), grab the fully charged Cuattro Uno and detector, power "On" within 20 seconds, and complete your exams in record time with auto-x-ray settings for each anatomy-view pair. Cuattro Uno utilizes the latest Heska InstaView™ technology to present images in 3 seconds from exposure. And with RapidShotX™ technology, Cuattro Uno accepts multiple projections at intervals as short as 6 seconds each. Now that's fast.

The revolutionary Cuattro Uno puts everything up close and at your fingertips. Heska's best-in-class images are easy to see, label, and optimize during exams. On-the-fly image adjustments and series order changes are made at a touch. And perhaps best of all for mobile practitioners, Cuattro Uno takes up HALF of the transport space of other solutions.

Cuattro Uno™

- 16 lbs
- Battery powered 90kVp and 20mA generator
- Capable of 500 exposures between charges

Hub Micro™

- 2 lbs
- 79,000+ Images and OS
- Windows 8.1 Embedded 64 Bit instant on/off
- Display: 8" removable wireless
- 10 Finger Multi-touch
- 1920 HD 12,000:1 Contrast Sunlight Readable
- Full PACS multi-image/multi-study review
- Battery: 2-3 Hrs Operation between charges
- InstaView and RapidShotX Technology
- Use with AED capable detectors
- Also operates stand-alone w/any generator
- 128GB SSD, 1TB Flash Drive
- 4GB DDR3 1600MHz Memory
- Dual MIMO 2.5/5.0MHz wireless operation of multiple detectors

Smart-Case

- Single external plug for in-case charging of generator, detector batteries, and Slate Micro
- High impact housing, heavy-duty handles

Cuattro Uno + Detector = Complete System

- Shown with 10x12" Wireless Digital Detector
- 14x17" Wireless Digital Detector also available
