Element POC
Blood Gas & Electrolyte Analyzer
Unsurpassed Accuracy on In-house Results

Critical chemistry, metabolic parameters, electrolytes and acid base results can be in your hand. With one test card for 18 parameters, the Element POC® provides ultimate convenience with point of care analysis that is available exactly when and where you need it. With one easy sample application, get results in 35 seconds from less than 100 µL of blood.

www.heska.com
Convenient
- Test card technology offers 18 measured and calculated parameters in one card with easy sample application
- Room temperature Test Card storage eliminates warm-up period and increases refrigerator space

Portable
- Bluetooth and Wi-Fi communication makes data integration easy

Test Parameters

**MEASURED PARAMETERS**
- PH
- PCO₂: Carbon Dioxide Partial Pressure
- PO₂: Oxygen Partial Pressure
- NA⁺: Sodium
- K⁺: Potassium
- CL⁻: Chloride
- CA++: Ionized Calcium
- CREA: Creatinine
- BUN: Blood Urea Nitrogen
- GLU: Glucose
- LAC: Lactate
- HCT: Hematocrit
- TCO₂: Total Carbon Dioxide

**CALCULATED PARAMETERS**
- cCHCO₃⁻: Bicarbonate Concentration
- cBE (ECF): Base Excess of Extracellular Fluid
- cAG: Anion Gap
- cCSO₂: Functional Oxygen Saturation Using Blood Gases
- cCHGB: Hemoglobin Concentration

Transfer or Print Data
- Wirelessly transfer or print results with optional Bluetooth printer

Easy Operation
- 3-step easy measurement
- Insert test card
- Introduce sample
- View results

Fast
- Results in 35 seconds
- Results when and where needed
