**Test Parameters**

<table>
<thead>
<tr>
<th>TEST</th>
<th>SPECIES</th>
<th>DIAGNOSTIC SIGNIFICANCE</th>
</tr>
</thead>
<tbody>
<tr>
<td>PT/aPTT Combo</td>
<td>Canine and Feline</td>
<td>Combination test measures both prothrombin time and activated partial thromboplastin time with one sample. Screen patients for clotting disorders before a procedure to avoid bleeding complications.</td>
</tr>
<tr>
<td>Fibrinogen</td>
<td>Canine and Equine</td>
<td>Quick, accurate, quantitative marker of systemic inflammation and excessive clotting factor consumption. Use for diagnostic confirmation of various medical conditions, therapeutic monitoring, and following disease progression.</td>
</tr>
<tr>
<td>Blood Typing</td>
<td>Canine</td>
<td>Confidently determine if patient is DEA 1 positive or negative in order to make life-saving transfusion decisions.</td>
</tr>
<tr>
<td></td>
<td>Feline</td>
<td>Quickly determine A/B blood type for educated transfusion and breeding decisions.</td>
</tr>
</tbody>
</table>

**Easy Operation** 3-step easy measurement

1. **Select test**
2. **Insert test card**
3. **Introduce sample**

**Features:**
- Easy to use
- Quantitative results in minutes when time matters
- Manage critical patients with confidence
- Simple addition to core lab with minimal footprint

**Benefits:**
- Results in 15 minutes or less
- Less than 100 µL of sample required
- Large 7” touchscreen
- Simple user interface

**Efficient:**
- Easy to use
- Quantitative results in minutes when time matters
- Manage critical patients with confidence
- Simple addition to core lab with minimal footprint

**View results**

**Convenient Cartridges**
- PT/aPTT Combo 12/box
- Equine Fibrinogen 12/box
- Canine Fibrinogen 6/box
- Canine Blood Typing 6/box
- Feline Blood Typing 6/box

**Simple Results Management**
- Seamless patient data management and integration with your Practice Management Software or HeskaView Integrated Software
- Search results by Sample ID, Patient ID, Date or Test Type
- Store and retrieve up to 1000 test results
