

heskaView+

Integrated Software

Data Management Solution

The NEW HeskaView+™ is one of the most advanced imaging PACS report and share platforms in the world. HeskaView+ delivers a modernized user experience on workstations and mobile platforms and enhanced speed on a scalable, secure platform.

Features

- Faster Image search, upload, and render times.
- Share images by text and email.
- Ongoing new Practice Management Software link updates.
- Mobile version for iOS and Android.
- Medical Grade Security protection from outside threats.
- HL7 Radiology Reporting, true radiology service with real time status updates.
- Compatible with Cuatro Series imaging.

Data Management

Find Study

HeskaView+ has many combinations of search criteria to use to find the exact patient study you need, quickly.

Share Study

Simply search for and highlight the study of your choice, select your recipient and send. Your recipient will now receive their secure DICOM study by email for review anywhere.

Study Review

Simply double click the study and manipulate with multiple tools including movie style image play, quick and easy zooming, rotation, annotation, and taking measurements.
