Immunodiagnostic Analyzer

The Future of Immunodiagnostics is Here!

Combine proprietary technology with a sleek, compact platform to bring you fast, accurate results with an expanding test menu.

Fast results in as little as 5 minutes

Room temperature cartridge storage

Accurate, quantitative results

Large color touch screen

Bi-directional interface

Easy Operation 3-step easy measurement

1 Enter Patient Information

2 Load Patient Sample

3 Insert Cartridge

Features:

Test Parameters

MEASURED PARAMETERS

T4	Diagnose and monitor thyroid disorders
cTSH	Diagnose and monitor hypothyroidism in canines
Cortisol	Diagnose and monitor patients with Cushing's or Addison's disease
Progesterone	Manage breeding and parturition and screen for reproductive diseases

COMING SOON

SDMA, cCrp, Heartworm, Lyme Disease, Anaplasma, Ehrlichia, and more

Convenience

- Fully self-contained micro-fluidic cartridge
- Simplified interface and operation with a small bench top footprint
- Small 100 μ L sample volume of serum or lithium heparin plasma

Accuracy

- Fluorescence immunoassay provides accurate, quantitative results
- Superior accuracy of patented, proprietary fluorescence waveguide immunoassay technology with laser evanescent illumination

In-Clinic

Expand your in-house diagnostic capabilities

- With run times of 10 minutes and under, you can diagnose patients and develop treatment plans within the first visit
- No more waiting for lab results and playing phone-tag with clients
- Quickly and easily schedule follow-up monitoring with complex patients

Results and Reporting

Efficient data management

- Integrate with Practice Management Software
- Bi-directional communication enabled auto patient entry and medical record reporting
- Sort options make retrieving previous patient results a snap
- Create comprehensive patient reports with results from other Heska analyzers
