

# PET CANCER CARE CONSULTING

## CONNECT WITH BOARD-CERTIFIED ONCOLOGISTS

Pet Cancer Care Consulting provides accessibility to an oncologist in the convenience of your family vet's office leading to personalized responses and additional information to make critical decisions for your pet family members.

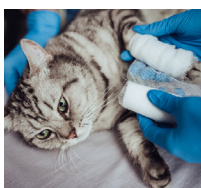

### TELEHEALTH

## Pet Care Solutions

### Full Pet Consultations

Video consult with the pet parent and veterinarian regarding the pet's cancer type, current results, testing recommendations, treatment options, and prognosis given in a professional, detailed, and easy-to-understand manner.

### Ongoing Patient Support

We can create an Individualized, Comprehensive, Treatment Plan for the pet following consultation. This includes a detailed therapy protocol for the vet clinic which includes a 15-minute discussion between the family veterinarian and oncologist. The oncologist is also available for follow-up questions regarding the pet after the initial consultation.

### Proactive Vet Clinic Support

We know that a clinic may have general oncology questions from time to time but do not need a full consultation. We offer a subscription service that provides veterinarians access to the oncologist through the portal by submitting written questions for back and forth conversation.
