

**PET POISON HELPLINE<sup>SM</sup>**

**Your trusted  
source for  
toxicology and  
pet health advice.**

# WHO WE ARE

## WE ARE...

- Staffed with leading veterinary toxicology experts including board-certified veterinary toxicologists, criticalists, and internists, in addition to CVTs and PharmDs.
- The most cost-effective option for animal poison control care, offering free follow-up consultations for each incident.
- Able to provide treatment advice for poisoning cases of all species, including dogs, cats, birds, small mammals, large animals, and exotic species.
- The world's largest industry poison control center.

## WE SAVE PETS' LIVES.

# WHY CHOOSE US

We are the only multi-disciplinary contact center in the world, triple-licensed by the Minnesota Boards of Veterinary Medicine, Medicine, and Pharmacy.

Our dedicated full-time staff of employees, **not contractors**, have knowledge in multiple veterinary specialties including toxicology, emergency and critical care, and internal medicine.

We provide unmatched professional leadership, expertise, and quality of care in all that we do.

Our staff have access to an internally developed toxicology, health and safety database containing proprietary ingredient information on hundreds of thousands of household and commercial products.

We are a trusted organization that consumers, veterinary professionals, academic institutions, industry leaders, and government come to for medical and toxicological information regarding animals nationally.

We are committed to education and poison prevention efforts for both pet owners and veterinary professionals.

We hold many academic affiliations and professional appointments to keep us informed with the most up to date information regarding the veterinary community and to contribute to the advancement of our profession.

We have over 35 years of experience and have managed over 2 million cases.

# HOW IT WORKS

1

## **An expert receives your concern**

Our experienced staff of veterinary professionals will gather information about the exposure.

2

## **We evaluate the poisoning**

We run calculations and determine if the pet can be monitored from home or should be seen by your veterinarian.

3

## **We consult with your veterinarian**

If veterinary care is warranted, we work together with your veterinarian to develop a treatment plan specific to your pet.

## **PET POISON**

**HELPLINE** is a

24/7 animal poison control center for pet owners and veterinary professionals that require assistance treating a potentially poisoned pet.

# MISSION

**Our mission is to save pets'  
lives and make the world  
a safer place for animals.**
